- Filling in the Shipping Tool Form: Enter the return and destination addresses.
- On the left, the “From” fields (return address): enter the name and complete address of the shipping library, including the postal code. You can type this in manually or access it from the “Address Book”. The name of the shipping library only has to be entered once per session.
- Using the Address Book:
  - Double click on “Retrieve from Address Book” in the blue bar at the top of the “FROM” fields.
  - Under “Select Address Book”, choose “CULC/CBUC” from the drop down menu OR check “Search all Address Books”.
  - Type in the name of the library you are searching for. It is probably best to search by the city name in the City field because the Library name can belong to more than one library in Canada. Click on search or press ENTER, then click on the correct library.
  - NOTE: If you cannot find the library for which you are searching, you will have to type in the library information manually. Please call PLS headquarters if an address is not found in the Address Book.
- On the right, the “To” fields (destination address): enter the name and complete address of the destination library, including the postal code. You can type this in manually or access it from the “Address Book”, using the above procedure. The name of the shipping library only has to be entered once when shipping multiple bags to the same destination.

- The postage for the library book rate is calculated based on a per kilogram basis. Weigh the parcel and record the number of kilograms in the “weight” field, rounding up to the nearest whole number (ie:for 4.6 Kg, use 5 Kg). Length, width and height measurements are now required. DO NOT identify a large bag of heavy items as a “document”.
